Teflon Coated Fabric Adhesive Tape

PTFE Coated Fabric Adhesive Tape				
Item	Thickness	Max width	Adhesion(to steel)	Tensile strength
COXCT008	0.08mm	1250mm	22N/100mm	900N/100mm
COXCT013	0.13mm	1250mm	28N/100mm	1700N/100mm
COXCT018	0.18mm	1250mm	448N/100mm	2750N/100mm
COXCT025	0.25mm	1250mm	62N/100mm	3650N/100mm

PTFE Coated Fabric Adhesive Tape manufactured with a high temperature resistant surface with pressure sensitive silicone adhesive. The reinforcement provided by the woven PTFE Fabrics Tapes adds tensile strength and tear resistance.

Coated Fabric PTFE Adhesive Tape can add a yellow corrugated release liner is used on our providing fast and easy removal. PTFE Coated Fabric Adhesive Tape are high performance products which can offer excellent release characteristics even under extreme premature.

PTFE Coated Fabric Adhesive Tape are used in many industrial products and processes, the silicone adhesive tape can continuous use up to 260°C. They are manufactured with a high temperature resistant surface with pressure sensitive silicone adhesive. The reinforcement provided by the woven PTFE Coated Fabric Adhesive Tape adds tensile strength and tear resistance

PTFE Coated Fabric Adhesive Tape are often used in heat sealing applications within the packaging industry for covering sealing jaws on L-Bar sealers for shrink films, heat sealers for polyethylene and cellophane films, on blister, and film equipment. They can also be found in vacuum and blister packing operations too. In these applications, non-stick properties and fiberglass' durability adds to long life and trouble free operation.
