Teflon Film Adhesive Tape

PTFE Adhesive Tape

Item	Thickness	Max width	Adhesion(to steel)	Tensile strength
COXFT008A	0.08mm	1250mm	20N/100mm	300N/100mm
COXFT013A	0.13mm	1250mm	25N/100mm	400N/100mm
COXFT018A	0.18mm	1250mm	44N/100mm	650N/100mm
COXFT025A	0.25mm	1250mm	58N/100mm	950N/100mm

Skived Teflon Adhesive Tape have a wide range of operations and can be supplied to tape from 10mm-300mm wide, in rolls of 10M or 33M length.

PTFE Adhesive tapes can adhesive a yellow corrugated release liner which is used on our providing fast and easy removal. Teflon adhesive tape has high elongation makes the tape useful in applications that require conformability. The combination of skived PTFE film and silicone adhesive offers an effective solution in high temperature and high dielectric applications.

Skived PTFE film tape provide exception ally smooth surface when applied and resist curling during unwind. Teflon film tape can surface chemical resistant of sealing and masking. It's ideal for use as a tank liner and for the lining of molds.

Skived PTFE adhesive tape provides superior wear resistance, low friction and a non-stick surface.

Skived PTFE Tapes Skived materials can be used in many industrial applications due to its unique properties.

Teflon film adhesive tape can used on mechanical applications such as electrical insulation, cable wrapping, gaskets, tank and vessel lining.

PTFE film adhesive tape also used in many other applications which requiring low friction, high temperature resistance or non stick surface.
