Skived Teflon Sheet

PTFE Sheet Size Specification:

Specification:	
Thickness	0.1-7mm
Width(mm)	500,800,1000,
	1200, 1500,
	1800, 2000.

Main Properties	
Apparent density	2.10-2.30g/cm ³
Tensile strength	28Mpa
Crack elongation	300%
Dielectric strength	12Kv/mm

PTFE Sheet available in Skived Teflon Sheet, molded PTFE Sheet and filled PTFE Sheet. PTFE material is a very good engineering plastic that has some fantastic properties which can provide some unique advantages over other materials in a combination that is exclusive to this material.

COX Plastic can supply cut to size PTFE sheet and also supply full PTFE sheet.

Skived PTFE sheets are available in rolls or cut to your desired size. COX Plastic also offers material slit to your desired width in order to help you reduce scrap and waste. This affords you the greatest economy and minimum scrap loss. We can also laminate or die cut all of our skived sheet and film products.

Skived PTFE Plate contains no fillers and has almost universal chemical resistance. Teflon Plate has excellent insulating capabilities and high dielectric properties. It has excellent low friction, non-stick, release properties and can bear high temperature stability allows for continuous use at extremely high temperatures.

Skived PTFE sheets available in a wide variety of virgin and modified resins as well as PTFE compounds.
